Quick learner, Logical thinking & used to practice JavaScript and Algorithms through online platform.

## KEY ACHIEVEMENTS

### Full Stack Projects

Built and deployed 4+ Full-stack project React.js, Node.js, MySQL All are hosted on GitHub

## SKILLS

HTML	CSS
Bootstrap	JavaScript
React.js	Node.js
Express.js	GitHub
MySQL	Postman
Vercel & Netlify	

## PROJECT DETAILS

**Project Name:** Electronic Voting System (Capstone Project)

E-Voting is a React based responsive web application designed for secure online voting and result publishing. This platform enables users to cast votes from anywhere with ease.

- Built a role-based voting platform with features like admin login, election management, and result counting.
- Designed using **Vite + React** for frontend and **Node.js, Express, MySQL** for backend.
- Implemented **secure authentication** and **dynamic result visualization**.

**Tech Stack:** Vite.js, Node.js, MySQL, Vercel | [Git Frontend](#) | [Git Backend](#) | [Live](#)

**Project Name:** Mayura Silks – Online Clothing Store

Built a full-featured e-commerce web app using **HTML, CSS, and Bootstrap**, hosted.

- Implemented signup/login, admin panel for product management, customer product listing, product details, cart, checkout, and order tracking
- Used **local storage** for product selection and data persistence, ensuring a complete shopping flow experience.

**Tech Stack:** HTML, CSS, Bootstrap, Vercel | [GitHub](#) | [Live](#)

**Project Name:** Digital Clock

Developed a responsive web application using **HTML, CSS, and Bootstrap** to display a live digital clock. Created multiple clock variations to enhance UI and functionality.

**Tech Stack:** HTML, CSS, Bootstrap | [GitHub](#)

**Project Name:** Swiggy Clone

Developed a responsive food delivery web app interface using **HTML, CSS, and Bootstrap**, implementing homepage, restaurant listing, and menu pages. Designed with a mobile-first approach to ensure responsiveness across devices and focused on replicating Swiggy's real-world UI/UX patterns.

**Tech Stack:** HTML, CSS, Bootstrap | [GitHub](#)
